

Project Information:

- What is the purpose of the site?
 - The purpose of this site is to give readers an idea about the multiple destiny 1 and 2 expansion packs. I have picked my personal favorites and not all DLC packs. This is because there are a lot of destiny DLC packs.
- Who is your intended audience?
 - My intended audience is new and veteran players to destiny. As someone who has played destiny, I can say that we often forget the little details that are so important in playing this game
- What is the new web technology that you added to your website? The web technology that I am adding here is HTML, CSS, and bootstrap for the nav bar. You can see how nice the nav bar plays with the additional css library from bootstrap.
- What opportunity, problem, or issue is your site addressing?
 - The problem my website is addressing is the lack of basic info with these DLC's. Sure, websites like reddit and the wiki are similar here but they go way into depth. This presents an issue for new players or veteran players looking for just basic info.
- What type of content might be included in your site?
 - Fire team finder form, data on raid armor sets, exotic weapons from bosses, and ultimately what these DLC's bring to the game.
- List at least two related or similar sites found on the web
 - One idea is a reddit page where we have different links to similar supporting topics.
 - The second idea is the bungie website for their external links. They placed it in the bottom so I figured I should use it as a footer.
